

Colligo Marine recommended Stopper Knot

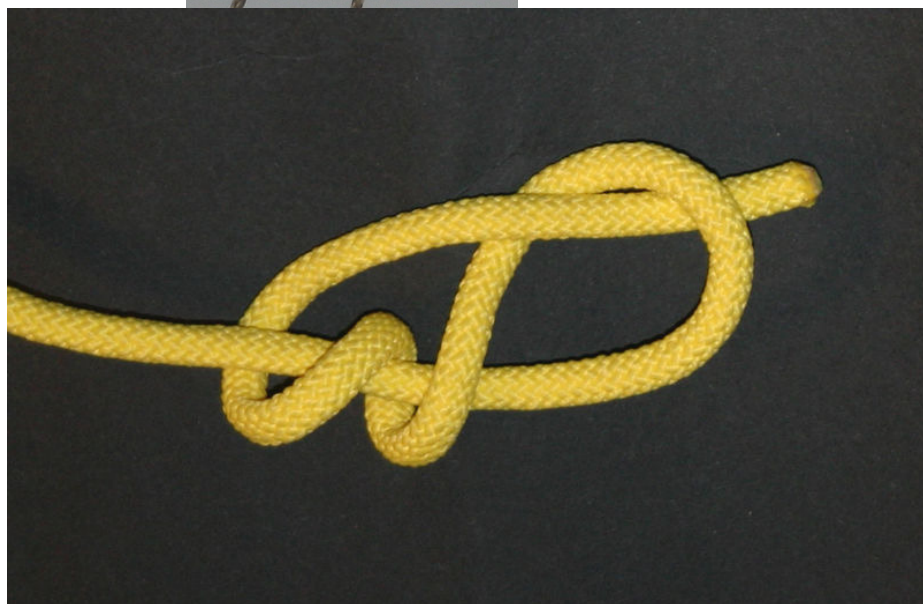

Stevedores Knot or Double Eight Knot

Using Dyneema SK-75 lashing line (Amsteel, Spectra, etc) the Stevedores Stopper knot pull tests at more than twice the slipping strength of an ordinary overhead knot in the below situation. Lashed thru our Line Terminator as shown below, an overhead knot will start slipping at about 7,000 lbs. The Stevedores (double 8) knot does not slip at 16,000 lbs in this configuration.

**Static lashing
block lashed to a
Line Terminator.**

**Stevedores
Stopper Knot
or "Double 8"**

Bringing innovative solutions to the marine industry.
